Description

If you need to remove or install engines and gearboxes from vehicles on regular basis for your mechanical workshop or garage, Hare & Forbes Machineryhouse defiantly has the perfect solution for you to make this job significantly easier, quicker and importantly with more accuracy and control. Simply connect your engine and gearbox combination to a chain block (not included) and lift to the desired height, then it is as easy as unlocking the brakes & wheeling the gantry out for removal or wheeling in position ready to lower for installation.

HAFCO Mobile Girder Rail Gantry MGT-1T
