**CBN Grinding Wheel**

**78x10mm**

## TOOLMASTER CBN Grinding Wheel CBN230

### Description

What is CBN (Cubic Boron Nitride)? CBN abrasive is a similar product to synthetic industrial diamonds.

CBN is composed of nitrogen and boron as very very hard crystals - second in hardness only to diamond. A single layer of CBN grit on the surface of a metal wheel can grind the hardest steel and last for many years. Our electroplated CBN grinding wheels are machined from solid steel, electroplated with a layer of CBN grit and nickel plated.

A CBN wheel is far better suited for sharpening high speed steels and will withstand the friction from grinding with much less heat produced than with a diamond wheel.

### Features

- 78 x 10 x 12.63mm (Diameter x Wide x Bore)
- CBN 230 for Carbide
- Suits PP-13C - Precision Drill Sharpener

### Specifications

<b>ORDER CODE</b>	D1117
<b>Type</b>	CBN 230 Wheel
<b>Grinding - Drill Bit Type</b>	HSS
<b>Sharpening Range (mm)</b>	~
<b>Suits Grinding Machine</b>	PP-13C
