

**TOOLMASTER SF-35M**

**Slapping File - Second Cut**

## TOOLMASTER Slapping File - Second Cut SF-35M

### Description

An old-time secret for removing dents or smoothing body work on hand fabricated panels.

The serrated face works in two ways:

1. It shrinks the stretched metal, and highlights high/low spots that require hammer and dolly work.
2. When used as a slapping hammer, with a dolly, files shrink metal to remove high spots. The files can also be used to remove metal

### Features

- Used on car panels for restoration repairs
- 2nd cut medium file
- PVC handle for better grip

### Specifications

<b>ORDER CODE</b>	F160
<b>MODEL</b>	SF-35M
<b>Product Type</b>	Slapping File -Second Cut
