Setup for Dressing a Grinding Wheel Close Up

Description

Rotary type wheel dressers are predominately used for cleaning and de-glazing many types of grinding wheels

Features

- Ø32mm x 12mm wide rotary dressing cutters
- Soft plastic hang grip
- 250mm overall length
- 12mm wide support lugs
- Please Note: requires you to adjust the tool-rest on the grinder wheel you intend to dress so the 12mm lugs can slide against the inside of the tool-rest while the wheel dresser is in a horizontal position to the grinding wheel
