Description

This precision boring head features two vertical holes and one cross hole for securely holding boring bars. It allows precise adjustment of the boring bar at a right angle to the spindle axis, enabling accurate positioning for boring holes with diameters ranging from 10mm to 100mm. The hardened and ground direct-reading adjustment screw features a satin chrome dial face, providing 0.01mm precise adjustments with excellent visibility. Perfect for professionals seeking reliability in metalworking, this boring head delivers exceptional results.

Note: Arbor sold separately.

Features

- Wide range of boring diameters and depths
- Boring diameter 10mm - 100mm
- Calibrated micro adjusting screw via a hexagon key.
- 1-1/2" x 18TPI threaded body to mount optional arbors
- Accepts 12mm diameter boring bars
- Includes boring bars and aluminium foam padded case for protection
