Parts Bin with Clear Window  
164 x 375 x 105mm**Description**

Manufactured in Taiwan, these clear front window parts storage bin systems provide a practical and durable solution for organising small parts, fasteners and workshop supplies. Designed for busy workshops and industrial environments, they keep components clearly sorted, easy to access and ready when needed.

Each bin is manufactured from high-quality ABS plastic (Acrylonitrile Butadiene Styrene), a tough thermoplastic known for its excellent impact resistance and durability. The smooth ABS surface resists oils and common workshop chemicals, while the clear front panels allow quick and easy identification of stored parts across the unit.

With a 20kg load capacity per bin, the system provides strong and reliable storage for a wide range of components. A rear anti-fall lip design prevents bins from sliding out when fully opened, providing safer and more convenient access.

A practical storage solution for keeping small parts organised and easy to locate.

**Features**

- Cabinets made from 0.8mm powder-coated galvanised steel for long-lasting strength and corrosion resistance
- High-impact ABS drawers with clear viewing windows for easy part identification
- 20kg load capacity per bin
- Oil, chemical and impact resistant bins
- Rear anti-fall lip design prevents bins from sliding out when opened
- Ideal for storing small parts, fasteners and workshop components
- Manufactured in Taiwan for quality and reliability

**Includes**

- Includes 30 bins & 60 dividers for improved organisation
- Optional dividers (sold separately in packs of 10) allow up to three compartments per drawer
