

METALMASTER MMF-8L

Laser Fume Extraction

High Volume up to 9000 m3/h Air Filtering Capacity

METALMASTER Laser Fume Extraction MMF-8L

Description

The Metalmaster Fume Extraction Units are designed to keep your machine and workshop clean by removing harmful dust and particles. Specifically designed to work with laser cutting machines, these advanced dust collectors effectively capture and filter out the tiny particles created during the laser cutting process.

The filter is equipped with automatic jet pulse cleaning so the system automatically cleans itself.

Features

- High Volume high-efficiency filtration system
- Intelligent Control System with 4.3" Touch Screen
- Robust design
- Designed specifically for laser cutting
- Siemens motor, ultra-high negative pressure fan
- Supports remote start from Laser machine

Specifications

ORDER CODE	W2725
MODEL	MMF-8L
Extraction Arm/Hose Length (Metre)	~
Extraction Arm Diameter (mm)	~
Air Flow (m3/h)	9000
Filtering Area (m2)	166
Inlet Size (mm)	300
Filter Type	Ahlstrom
Filtration Efficiency	99.99%
Collector Capacity (L)	90
Voltage / Amperage (V / A)	415 / 20
Motor Power (kW)	11
Compressed Air Requirements (Mpa)	0.6
Air consumption (m3/min)	0.32
Main Unit Size (w x l x h) (mm)	1470 x 2220 x 2580
Nett Weight (kg)	1200
