Description

Manufactured in Taiwan

The main advantages of this CDS-2/3 cyclone separator is the ability to extract and hold large particles and chips before they reach the dust collector impellers resulting in no more loss of suction from blocked filters. The cyclone is designed as a pre-filter for your dust collector. It has no moving parts, and nothing to wear out, clog up or replace.

Separates up to 99% of dust from the air stream prior to reaching the filter. This prevents your collector's filter from clogging, allowing you to work safer and longer while saving you valuable time and money on replacement filters and collection bags. The mobile collection bin is fitted with a waste sight viewing window and wheels for easy disposal.

HAFCO-WOODMASTER Cyclone Dust Separator CDS-2/3

Features

- Large 110 litre metal collection bin
- Air tight clamping with rubber seals
- Ø152mm inlet with 2 x Ø100mm reducer
- Ø152 - 25mm stepped outlet reducer, Ø152, 125, 100, 75, 63, 50, 25mm
- Viewing window on collection bin for waist level
- Capable of running dust bags in collection bin
- Ideal for the up to 3hp dust collectors
- Made in Taiwan

Specifications

ORDER CODE	W316
MODEL	CDS-2/3
Type	Cyclone Dust Separator
Airflow (CFM)	~
LPHV - Low Pressure High Volume (Yes / No)	No
HPLV - High Pressure Low Volume (Yes / No)	No
Inlets / Diameter (No. / mm)	2 x Ø100
Outlets / Diameter (No. / mm)	Ø152 ~ 25mm
Motor Power (kW / hp)	~
Voltage (V / amp)	~
Floor Space (W x D x H) (mm)	650 x 560 x 1700
Nett Weight (kg)	19
